New York, New York · Open to Remote

PROFILE

Frontend engineer specializing in *React, Next.js, and TypeScript* building responsive, high-performance web applications. Proven track record delivering production applications for startups and small businesses while driving measurable improvements in user engagement and site performance.

EXPERIENCE

Frontend Engineer — Freelance

Jun 2020 - Present

Charles Interactive · Remote

- Built and deployed custom web applications for small businesses and startups using **React, Next.js, and TypeScript**, delivering pixel-perfect implementations that exceeded client expectations.
- Improved page load times and user engagement through **code splitting, lazy loading, and bundle optimization** strategies.
- Architected component-based design systems with reusable UI libraries, accelerating development cycles across multiple client projects.
- Implemented complex state management using **Redux and Context API** for applications handling real-time data, authentication, and multi-step workflows.
- Developed server-side rendered applications with **Next.js**, improving SEO performance and initial load speeds for e-commerce and marketing sites.

SKILLS

FRONTEND

React · Next.js · TypeScript · JavaScript (ES6+) · HTML5 · CSS3 · SASS

STYLING & UI

Tailwind CSS · Styled-components · Bootstrap · Responsive Design

STATE MANAGEMENT

Redux · Context API · React Hooks

TOOLS & WORKFLOW

Git · GitHub · npm/yarn · Vite · ESLint · Prettier · Adobe XD

TESTING & PERFORMANCE

Chrome DevTools · Lighthouse · Code Optimization · Lazy Loading

BACKEND & APIS

Node.js · Firebase · REST APIs · Authentication

DEPLOYMENT

- Integrated **RESTful APIs and Firebase** for authentication, real-time database updates, and third-party service integrations.

Network Specialist Intern

Jun 2019 - Sep 2019

Thor Equities · New York, NY

- Improved internal Intranet performance through **frontend optimizations** and debugging.
- Conducted cross-browser testing to ensure consistent functionality across multiple platforms.
- Participated in code reviews and implemented best practices for web development standards.

SELECTED PROJECTS

Origami Interactive Website

Live Site

Interactive web experience showcasing origami art with engaging user interface design. Built custom React components for dynamic content presentation and user interaction with optimized build configuration for fast load times.

React · JavaScript · CSS3

Parasite Film Concept Website

Live Site

Immersive single-page concept site inspired by the award-winning film, featuring dynamic UI elements, smooth animations, and a fully responsive layout across all devices.

React · CSS3 · Responsive Design

Apple AirPods Max Landing Page

Live Site

Minimalist product landing page inspired by Apple's design language — performance-focused interface balancing aesthetics with information density across all screen sizes.

React · Bootstrap · Responsive Design

RESONANCE — Interactive Musical Installation

ImagineRIT 2019

Led a team of 5 to build an award-winning interactive installation with real-time music visualization and audio processing. Showcased at ImagineRIT and praised by hundreds of visitors.

Java · Processing · C# · JUCE

Vercel · Netlify · Firebase Hosting

EDUCATION

Rochester Institute of Technology

B.S. New Media Interactive Development
